

Task 1 - File Organizer Automation Script

Objective : The objective of this project is to automate file organization using Python. The script sorts files into different folders based on their file extensions and records all operations in a log file.

Technologies Used: Python, os module,shutil ,logging.

Features :User enters folder path , Organizes files automatically , Creates folders , Generates log file , Exception handling

Code Snippets

```
main.py > -
1 import os
2 import shutil
3 import logging
4
5 # Logging Configuration
6 logging.basicConfig(
7     filename="operations.log",
8     level=logging.INFO,
9     format="%asctimes - %(levelname)s - %(message)s"
10 )
11
12 # File Categories
13 categories = {
14     "Images": [".jpg", ".jpeg", ".png", ".gif"],
15     "Documents": [".pdf", ".doc", ".docx", ".txt"],
16     "Videos": [".mp4", ".mkv", ".avi"],
17     "Music": [".mp3", ".wav"],
18     "Programs": [".exe", ".msi"],
19     "Archives": [".zip", ".rar", ".7z"]
20 }
21
22 folder_path = input("Enter folder path: ")
23
24 if not os.path.exists(folder_path):
25     print("Folder does not exist.")
26     exit()
```

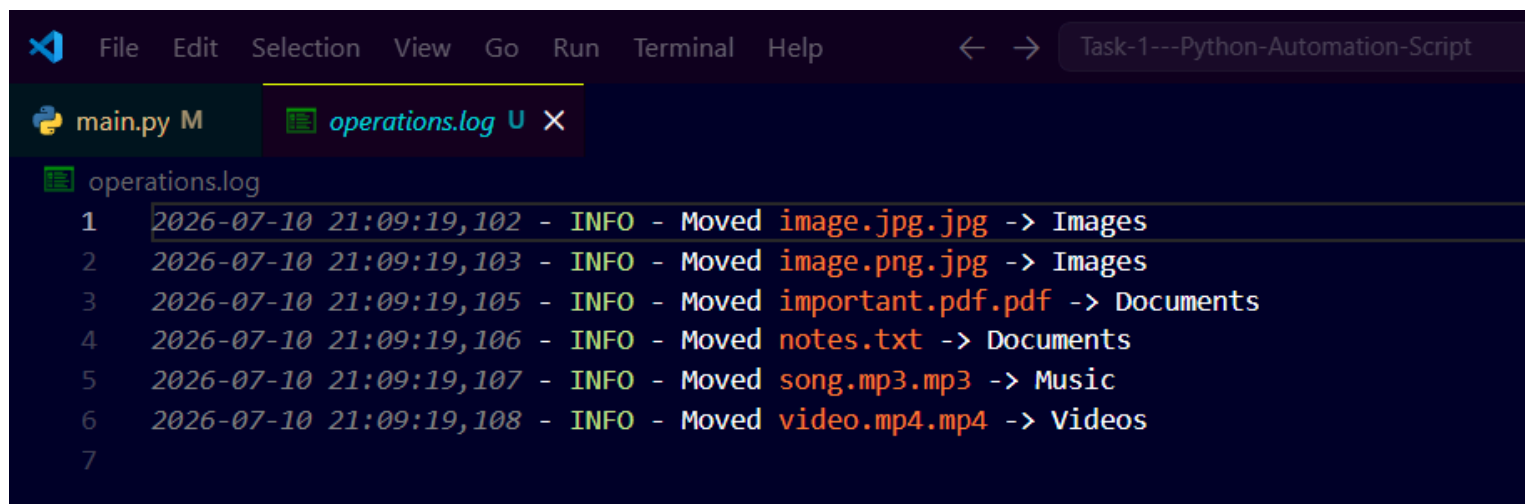

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

PS C:\Users\dinod\Desktop\Python Projects\Task-1---Python-Automation-Script> python -u "c:\Users\dinod\Desktop\Python Projects\Task-1---Python-Automation-Script\main.py"

Enter folder path: D:\TestFolder

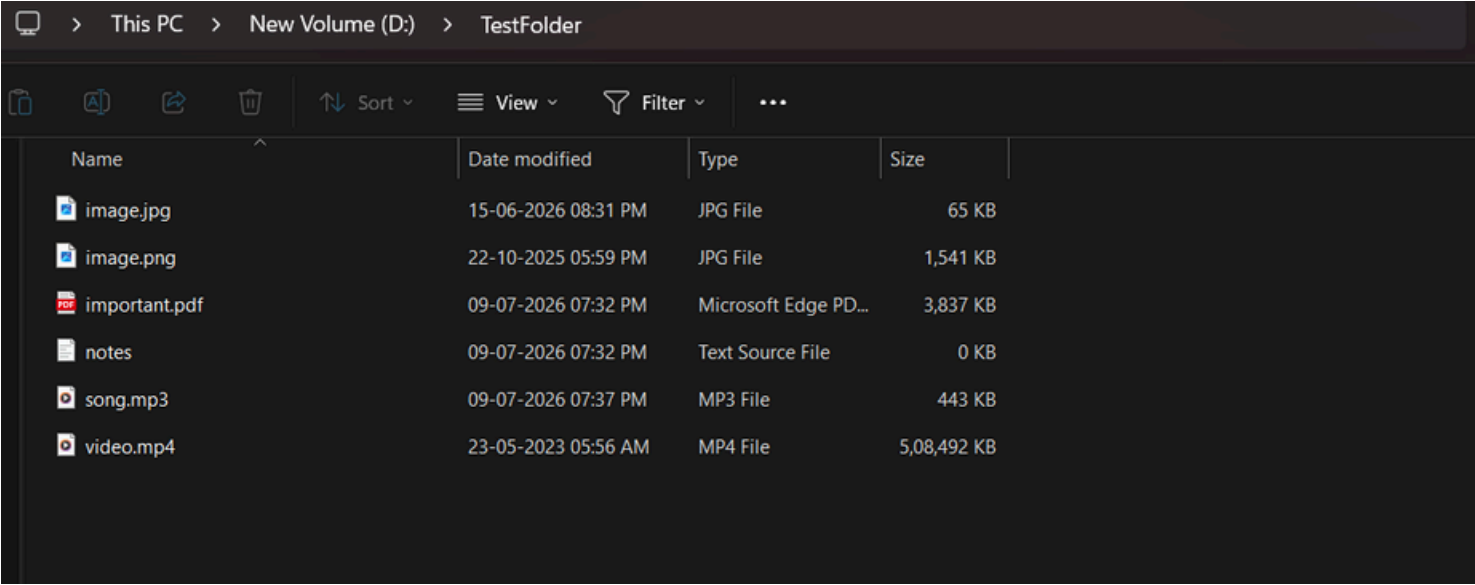

Organization Completed Successfully!

PS C:\Users\dinod\Desktop\Python Projects\Task-1---Python-Automation-Script>

```
main.py M operations.log U X
operations.log
